Router configuration guide
Hello and thank you for choosing Magnet Entertainments’ Simply Broadband Package.
In this brochure you will find information on how to set up your existing router to access the Magnet Network. We feature three router models in this brochure which are the most popular DSL routers. These are the

- Netopia 2200 series
- Huawei HG556a series
- Zyxel 600 series

If you have one of these routers please follow the step by step set up process.

If you are still experiencing problems in setting up your router then you can call our customer help line on 0818 226226. You could also consider renting a Magnet router which is pre-configured and ready to go; these can be despatched by courier within two working days. It’s just €5 per month, which is added on to your monthly bill.

Thank you

Magnet Entertainment Sales

MAX SPEED POSSIBLE
24Mb ADSL2+

CONFIGURE NETWORK CONNECTION
- Connect your workstation/laptop to the modem’s LAN port with an Ethernet cable.
- Use your preferred web browser to open the GUI interface of the modem using the following URL: http://192.168.1.254
- Once logged in, go in expert mode by clicking on the 'Expert Mode' menu on the left side of the GUI.

CONFIGURE WIRELESS
Magnet recommends that you set up security on your wifi router.

RESET TO DEFAULTS
If you have attempted to configure the router and you are still having problems first try to reset the router to default settings and try to configure the network connection again.

ROUTER CONFIGURATION SUPPORT
If you are still experiencing problems setting up your router then you can call our customer router configuration line on 0818 226226.

You should also consider a Magnet router which is set up, ready to go and can be dispatched by courier within 2 working days. It’s just €5 per month. Speak to one of our sales agents to upgrade to this router.
Wait for about one minute. If it doesn’t work then reboot the router.

SET UP WIRELESS
Magnet recommends that you set up security on your wifi router.

RESET TO DEFAULTS
If you have attempted to set up the router and you are still having problems first try to reset the router to default settings and try to configure the network connection again.

1. Turn on the modem
2. Press and hold the RESET button (on lower back panel of the router) for a minimum of three seconds and then release it.
3. Alternatively, you can login on the GUI, and chose Management > Settings > Restore Default menu. Click on ‘Restore Default Settings’.
